

Pop-Up Display Tray In Counter Unit
(patent pending)

Flat Display Tray In Counter

A Security Door is optional
for all sizes

Identification numbers

Pop-Up Tray In Counter

The individual tipper strips that hold the voided tickets are made of .125" Black ABS and include a taped clear extrusion to house and display the voided tickets.

On the under side of the tray that holds the voided tickets, is a slide plate made from .120" White PVC material. This plate acts as a movable component so that tickets can be laid in a flat position or an angled view.

Flat Tray In Counter

On the Flat Tray model, taped clear extrusion channels are adhered to the .250" Black Foam PVC tray to display voided ticket cards.

Both the Pop-Up & Flat Tray In Counter Dispenser

The frame of the display measures 20.25" x 20.25" and is injection molded of black, glass filled nylon material. The lip of this frame measures 1.25" wide on all four sides.

A 1/8" piece of tempered glass is sealed against leakage with black VHB tape measuring approximately .045" in thickness. An additional 1/8" piece of tempered glass lies on top of the sealed glass as a replaceable protective surface.

The ticket display tray of the Pop-Up & Flat Tray models are constructed of .250" Black Foam PVC.

The sides and bottom of the dispenser are manufactured from .500" Black ABS Plastic. The front and top of the dispenser are made from .187" Black ABS plastic.

The drawers of the dispenser are injection molded of White ABS plastic and are removable for loading of tickets. Each drawer has a Cam-Action lock for security with two keys provided with each unit.

Unit will include one set of numbers to place on glass for identification purposes.
